

Climate Science Journal Financial Plan

We are raising \$230,000 by selling 3,000 1-gram tokens at a 10% discount off the recent gold price of ~\$85. The tokens are owned by the Editor-in-Chief of the *Climate Science Journal*, Kevin Kirchman, who is donating them upon sale to get the publication off the ground in a formal, professional way with the highest epistemological standards of knowledge. Investors/donators can [buy](#) in 1-gram (£57) units with a 10% discount, or 70-gram units for a 20% discount.

Mr Kirchman has degrees in mechanical and aerospace engineering from Cornell University, with a specialization in heat transfer and thermodynamics, which are the technical fields at the basis of climate science. He also has a degree in computer science from UGA and did graduate work in philosophy of science at the London School of Economics.

In addition, Mr Kirchman developed over a 10-year period a broad-based epistemological theory, including new theories of deduction, induction, validation, lexicology and syntax. Three of these theories were used at the basis of commercial AI software sold to clients such as Litton Aerospace, P&G and Baxter Healthcare, in a firm he founded that was subject to an acquisition offer from a G100 tech firm. The company was the first to deliver direct answers from live, unstructured text in the general case, without the use of neural networks. He is the author of two books, one on the qualities of character at the basis of professional achievement, and the other on validating ideas, particularly relevant to climate science, where he has shown that the prevailing "greenhouse gas" theory is invalid scientifically.

His new theory of validation is a substantially-improved scientific method, which is also being developed into advanced AI software for educational and scientific applications.

The \$230k will be used as below, to provide funding for 1-year and then become profitable from subscriptions to corporations, universities and individuals, eventually building an endowment for funding in perpetuity:

	Per 4 Papers	Months	Persons	Yearly	Price/	Total	Gold Price	Tokens	Discount
Scientific Board			5	\$ 4,200		\$ 21,000	\$ 85.58	3,000	10%
Papers	\$ 6,000	12	1	\$ 72,000		\$ 72,000			
Costs for Publishing	\$ 2,000	12				\$ 25,000			
Capex for Scientific Projects						\$ 30,000			
Editor/Business Manager/Tech						\$ 60,000			
Advertising						\$ 12,000			
Misc						\$ 10,000			
						\$ 230,000			
Revenue from Universities, Corporations	12	2,000		\$12.00		\$ -288,000			
Climate Science Journal Endowment						\$ 2,300,000			

The average cost per title for journal subscriptions is \$21, with public universities and colleges paying \$23.48 and private universities and colleges paying \$18.74

The Climate Science Journal will produce a monthly journal including four original, state-of-the-art papers plus an editorial. The plan is to break-even after one year and to raise a \$2.5 million endowment over 3 years to fund more substantial scientific research.

The Gold-backed Tokens are OXGA tokens from <https://www.ordinalgold.io>, which are backed in a ratio of 45:1 with reserve estimates of 3.6 million grams of gold from mines under contract to provide gold backing.

OrdinalGold.io operates as a gold purchasing service, facilitating the direct purchase of gold from verified miners. Ordinalgold.io is not an investment advisory service or a provider of investment opportunities. This offering is strictly intended for individuals or entities seeking to buy and take ownership of physical gold, rather than for those seeking speculative or financial investment opportunities. OrdinalGold.io complies with applicable legal and regulatory frameworks, including but not limited to:

- + United States: Regulations under the Commodity Futures Trading Commission (CFTC) and compliance with Anti-Money Laundering (AML). Program Requirements under the Bank Secrecy Act (BSA).

- + United Kingdom: Compliance with the Financial Conduct Authority (FCA) guidelines concerning precious metals transactions.

- + European Union (France, Germany): Adherence to MiFID II standards and the Anti-Money Laundering Directive (AML) framework.

- + Australia: Compliance with the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (AML/CTF) and precious metal regulatory guidelines.

- + India: Adherence to the Prevention of Money Laundering Act (PMLA) and regulatory guidelines for precious metals.

- + Singapore: Compliance with the Monetary Authority of Singapore (MAS) regulations and Financial Advisers Act (FAA) for asset-purchase alignment
